PROFESSIONAL SUMMARY

Junior Software Engineer with 1 year of experience building full-stack web applications and internal business tools using React, Laravel, PHP, and PostgreSQL. Proven track record of digitalizing complex business workflows, including delivering construction project management and resource allocation systems that improved operational efficiency by up to 50%.

EDUCATION

Universitas Multimedia Nusantara
Bachelor of Informatics, GPA 3.8/4.0

SKL Received (Degree Completed)
Graduated: August 2026

SKILLS

Frontend: HTML/CSS, JavaScript, TypeScript, React, React Native, Expo, Vue, Tailwind CSS, Figma

Backend: Node.js, PHP, Laravel, Kotlin, REST API Integration

Databases & Tools: PostgreSQL, MySQL, Supabase, Firebase, Git, Scriptcase, Google Gemini API, Make.com

Languages: Indonesian (Native), English (CEFR C2, TOEIC 940)

WORK EXPERIENCE

PT. Bonumata Asia

September 2025 – January 2026

Junior Developer (Internship)

- Developed a construction project management platform using Scriptcase and PostgreSQL, digitalizing cost budget plans (RAB), contract generation, and the version control of construction templates and 3D files, improving project visibility and reducing manual administrative processes.
- Translated construction business workflows into scalable software solutions by implementing modules for budgeting, contracts, project execution, and reporting while collaborating with stakeholders.

PT. Nusantara Compnet Integrator

February 2025 – August 2025

Internal Application Developer (Internship)

- Developed a real-time team quiz web application using Socket.IO for internal company events, achieving over 90% positive participant feedback.
- Developed a full-stack resource management system (Laravel, PHP, MySQL) with digital borrowing and approval workflows, improving equipment request efficiency by 50% across multiple divisions.
- Developed a web-based meeting room booking system, digitizing reservation workflows and improving scheduling efficiency by approximately 40%.

PROJECT

Machine Learning for Drug Discovery (Undergraduate Thesis)

November 2025 – July 2026

Lead Researcher

- Trained and evaluated ensemble machine learning models (XGBoost, Random Forest, LightGBM, Cascade Deep Forest) to predict drug-target interactions for lung cancer therapies.
- Processed complex molecular data from Indonesian herbs using cheminformatics tools and the KNApSACk database to identify potential therapeutic candidates.

LearnMuse: AI-Powered Educational Platform

July 2025

Full-Stack Developer

- Developed an AI-powered educational platform (LearnMuse) during a 30-hour hackathon, leveraging React, Node.js/Express.js, and Supabase; integrated Google Gemini API for generating multi-language lesson plans and quizzes; and incorporated Manim for animated math explanations with Azure TTS for narration, showcasing strong full-stack development and AI integration skills.

NusaVision: Freelance Marketplace

December 2024 – January 2025

Developer

- Developed and implemented the frontend for the NusaVision freelance marketplace, a paid client project, focusing on robust UI/UX, secure user authentication (Google Firebase sign-up), and integrating a static chatbot for user support, while collaborating with cross-functional teams to ensure application stability.

To-do list App for parents and kids

August 2024 – January 2025

Full-Stack Developer

- Developed an interactive to-do list app for Android using Kotlin, supporting parent-child and single-user modes, with features like task creation, assignment, and reminders.

E-Learning Platform for SMP Mater Dei School Pamulang

August 2023 – December 2023

Full-Stack Developer

- Developed a comprehensive prototype for an e-learning platform, including the design and implementation of an interactive calendar feature to efficiently manage and display class schedules, events, and homework deadlines. Technologies used: React, Tailwind CSS, Laravel, Node.js, PHP, and MySQL.

UMN ECO 2023

March 2023 – December 2023

Frontend Developer

- Developed the front-end part for the organization's website using Laravel, PHP, Bootstrap and CSS, creating a more intuitive and engaging online platform increasing user engagement by 20%.
